

WELDMAX

335s MIG Welder

Three phase Mig welding machine for light and medium duty fabrication and repair. Excellent machine for industrial and manufacturing workshops. Smooth output performance for high quality welding of all materials. Easy to use controls for quick and precise adjustments. The Weldmax 335s has a proven reputation for reliability and performance.

- ◆ Fully copper wound transformer for consistent and reliable performance in the most demanding conditions
- ◆ Gear drive wire feed system ensures consistent wire feeding of all wire types
- ◆ Smooth performance on all thickness materials
- ◆ Proven traditional design for reliability and easy servicing
- ◆ 3 year transformer warranty
- ◆ Australia wide back up service and spare parts availability.

Ideal for

Production manufacturing and repair

Technical Specifications	Weldmax 335s
Input voltage	415v 3 phase
Output amperage range	30—335 amps
Duty cycle (10 minute cycle)	335amps @30% 250 amps @60%
Voltage output settings	14 (2 coarse + 7 fine)
Wire size: Steel/ stainless	0.6mm - 1.2mm
Wire size: Aluminium	0.9mm - 1.2mm
Wire size: Flux core	0.8mm - 1.2mm
Machine weight (approx.)	87 kg

Package includes

- ◆ Separate wire feeder unit with 8 metre cable set
- ◆ 4 metre MIG Torch
- ◆ Gas Regulator
- ◆ 8 metre earth lead
- ◆ Input lead
