Capability Statement

We're Focused on Welders & Fabricators

The Jaymac philosophy is "do one thing and do it well" - This is in contrast to the "jack of all trades, and master of none" approach.
So we're happy to admit we are not your supplier for hand towels, nuts and bolts, cordless drills or gas BBQs. But… If you're looking for a welding & metalfab equipment supply partner that has experience, is focused on what you need and can deliver it promptly and competitively – then that is exactly what Jaymac is all about.

Large Stocks, Reliable Supply, Competitive Pricing

It just makes sense! Being focused on a specific range of product means we can keep larger stocks & serve you better through;

- Greater buying power & more competitive pricing
- Prompt dispatch and delivery
- Minimising short deliveries and back orders

Over 1,000,000 items in stock - ready for immediate delivery!

Free Freight

Jaymac delivers welding products to customers all over Australia, all day, every day.
Free freight is available for most areas – for example orders over $200.00+GST to anywhere in NSW are freight Free*

Experienced Support, Genuine Care

At Jaymac, we believe that quality products should be backed by a quality team. A low staff turnover means that our team is more experienced and well trained. Also, many Jaymac team members have extensive experience in diagnostics and repair which is a big advantage when it comes to recommending the right product for your application. It's all part of making it 'simply easier' for you.

Global Connections

Jaymac has direct connections with manufacturers & industry leaders world-wide.
Jaymac directly imports many products, and has affiliations with international brands such as: Taipan Abrasives Group, Weldclass, PlasmaCam, Hypertherm, Jackson Safety (Kimberly Clark Professional) & Hyundai Welding, just to name a few.
This keeps us up to date and better able to provide you with the right product & value for money.

Tried, Tested & Proven Products

We're sure you will agree that it is not good enough to just have products that look good "on paper". We take a lot of time & invest heavily in R&D to ensure that all our products perform in "real life" conditions. That's why we have our own demonstration and test facilities, including CNC testing equipment for products like abrasives.

Abrasives

Feature Product:
Taipan Original Flap Disc

Jaymac have been heavily involved in supplying industrial abrasives for decades. Our unique range of abrasives include excellent value traditional products as well some very innovative solutions to make your job… **simply easier.**

We have invested very heavily in testing abrasive products to ensure that we deliver superior quality and reliability including extensive testing on our own in-house CNC equipment. We do the testing so you don't have to! Our clients buy with confidence… it's **simply easier** that way…

TAIPAN ORIGINAL Flap Disc

- Manufactured in Europe
- Tried, Tested & Proven by Australian Fabricators for Over 15 Years
- Up to 30% More Grit Cloth than other brands = Longer Life & Less Down-Time
- Popular Conical Shape for Grinding/ Finishing a Variety of Surface Shapes

JAYMAC Tech Tip

This disc will **perform best** when **moderate to heavy** grinding **pressure is applied** (pushing the grinder into the workpiece). This will **extend disc life** and also achieve **optimum grinding performance** (metal removal).

Weldclass Platinum GL-II GASLESS WIRE

The comprehensive range of welding consumables at Jaymac encompasses all the basic welding electrodes and wires as well as a vast range of specialised products in stock on our shelves. Can't find what you need? Give us a call! Our vast choice of quality brands including Hyundai®, Weldclass®, WIA®, Hyundai, Safra®, INE®, Welding Alloys® and many more are bound to satisfy your needs.

Rated by Hundreds of Aussie Welder's as Australia's No.1 Gasless Wire

SEE PAGE 23

Easy to use, even on steel that is slightly rusty or dirty and on painted steel surfaces

Suitable for Single or Multi-Pass Welds

Vacuum Foil-Sealed Spool, for Exceptional Storage Life in All Conditions

Ideal for outdoor or onsite use and welding in windy conditions

Ultra-Smooth Running with Minimal Spatter

Ideal for portable use - no gas required

All positional wire, for use on mild and galvanised steel

Electrodes
Weldclass Platinum 12V (GP)

- Excellent Operator Appeal: Very Smooth & Stable Arc, Easy Striking, Low Spatter, Self-Detaching / Easy-to-remove Slag
- User Friendly: Tolerant to Dirty / Rusty Steel & Poor Fit Up
- All-Positional: Fast-Freezing Slag for fillet & butt welding in All Positions, including Vertical Down

Application Info

- Ideal General Purpose electrode for fabrication, repair, fencing, light structural & more
- Unbeatable Performance on: Mild, Galvanized, Plate, Sheet & Tubular/RHS Steel
- AWS specification A5.1 E6013 / AS/NZS Specification 1553.1 E4112-0

WIA 12P (GP)

- Easy starting, smooth running.
- Popular all positional mild steel general purpose electrode.
- Easy to use

Application Info

- For mild & galvanised steels
- Typical applications include welding of general purpose structural steel, galvanised gates and fences, trailers, steel furniture and wrought iron.
- Classifications: AWS A5.1 E6013 / AS/NZS 4855-B - E43 13A

Low-Hydrogen 7016

- Low Fume and good crack resistance
- Ideal for high strength welding of medium and heavy sections
- Good impact toughness

Application Info

- Low Hydrogen electrode for welding high strength steel
- Commonly used on steel members subject to high load: machinery parts, ships, bridges, buildings and pressure vessels
- All welding positions, excluding vertical down

Low-Hydrogen WIA Austarc 16TC

- Smooth running, basic low hydrogen electrode
- Developed for all positional (except vertical down) welding
- Exceptional arc stability and weldability

Application Info

- High strength welding of heavier steel sections
- Welding carbon, carbonmanganese and low alloy high strength steels
- Ideal for earthmoving equipment repairs
- Typical applications include pipe welding, single sided weld joints, highly restrained joints, maintenance applications, buffer layer prior to hard surfacing build-up, structural steel and sub zero temperature applications.

Gas Equipment

Heating Tips
Oxy/Acetylene

- Proven Quality
- Precision Machined = Prevents flashback & back-fire

Application Info
- For use with oxygen/acetylene
- Connects to P4-SHB Tube/Barrel

Operator Info
- Heating with Oxy/Acetylene has limitations and hazards. Care must be taken to ensure that the maximum draw-off consumption rate of acetylene is not exceeded (consult your gas supplier for details). For this reason, Acetylene tips are available only up to size 2.
- Where possible, Jaymac recommends that Oxy/LPG be used in preference to Oxy/Acetylene. LPG is safer and less prone to flashback or backfire, and larger tip sizes are available for heavy heating. LPG is also often only a fraction of the cost of Acetylene.

Feature Product:
CNC Plasma Packages

CNC Plasma Profile Cutting Table Systems

Owner Benefits

- **Convenience;** profile cutting in-house
- **Profit;** Expand your business
- **Reduce Waste;** Turn your scrap metal into parts
- **Slash Costs;** reduce your cutting costs
- **Speed-up Productivity;** cut back turnaround times

Ideal for:

Industrial components

Signage

Artwork

Heavy Production

Sheetmetal

Feature Product:
CNC Plasma Packages

CNC Plasma Profile Cutting Table Systems

The Jaymac Advantage

- **Applicable -** custom packages tailored to your requirements
- **Affordable -** Deal direct with importer
- **Dependable -** Genuine in-house tech support
- **Easy to Use & Learn -** Integrated Windows based CAD/CNC Software
- **Made in USA -** Robust Design
- **Complete Packages -** Just add power & air

CNC Plasma Profile Cutting Table Systems
PlasmaCAM DHC2 Model

Designed for cutting components from flat plate and sheet.

PlasmaCAM model is a compact package designed for workshops with limited space. Features a handy 1.2 x 1.2 metre cutting table. Ideal for engineering, smaller production components, Sheetmetal and product development. Also an excellent choice for schools and colleges.

Cutting Capacity up to 25mm thick

Create Impressive Custom Artworks

Multiple Component Cutting

High Speed accurate Sheetmetal cutting

CNC Plasma Profile Cutting Table Systems
Samson 510 Model

Designed for cutting components from flat plate and sheet.

Samson model has all the features of the compact plasmaCAM model with a full size 1.5 x 3.0 metre cutting bed.
Ideal for production workshops cutting larger and multiple components. Suitable for engineering, sheetmetal, signage and product development applications. See next page for package options.

- Cutting capacity up to 25mm thick
- High speed cutting up to 8000mm per minute
- Digital height control system provides quality cutting even when plate is not flat.
- Low operating costs
- Easy to use
- Hypertherm High Performance plasma

Full size table ideal for multiple component cutting

Industrial component cutting

- Steel
- Aluminium
- Stainless Steel

Easy to use control system allows adjustments while machine is operating

DID YOU KNOW?

Plasma Technology

What is Plasma Cutting?

Plasma technology works by ionising air such that it can conduct electricity. This ionized gas is used to produce an intense arc capable of cutting any electrically conductive material. Plasma cutting only requires electricity and compressed air supply.

Plasma Cutting vs Oxy Cutting

- Speed—2 to 5 times faster than oxyfuel cutting process. No gas pressures, no flame to light, no pre-heat time and less clean-up!
- Savings—30% or more savings on operating cost vs oxyfuel. No special gas required and no cylinder rental!
- Cut finish—higher cut quality , less clean up
- Cut any metal—cuts and gouges steel, stainless steel, aluminium and almost all metals
- Safety—only need compressed air and electricity—no flammable gases needed
- Easy to operate—anybody can use it with minimal training

Plasma Gouging vs Air Arc Gouging

- Speed - faster than air-arc gouging
- Cleaner - relatively smooth finish can be achieved with no carbon deposits - no secondary clean up required
- Savings - no consumables (does not require gouging carbon rods)
- Easier - much simpler to use than air-arc gouging. Much easier to train users, much more controllable and better cutting result
- Gouges any metal - Steel, Stainless Steel, Aluminium, Titanium, and almost all metals
- Safety - much, much quieter and much less fume than air-arc gouging

Hypertherm Plasma Technology

For nearly 50 years Hypertherm has been solely dedicated to the design and manufacture of the most reliable, most consistent, highest performance metal cutting products on the market. Today, Hypertherm's range of Plasma Cutters is internationally renowned as the best in the world.

JAYMAC Tech Tip

Air Filtration for Plasma Cutting

Clean and dry compressed air supply makes a **huge difference** to consumable life on Plasma systems. Dirty or wet air is hard on the tips and electrodes and will cause them to wear much faster.

In addition to this, clean and dry air will **significantly improve cut quality.**

As a bare minimum every plasma system should have a good quality filter (e.g. Hypertherm Eliminizer) attached to the plasma cutter. For users doing a large volume of cutting or critical work a refrigerated air dryer is **highly recommended**. This is even more important in coastal and humid environments. Any refrigerated dryer should have a good quality pre-filter to clean the air before it enters the dryer.

Air Dryer
Refrigerated

- The most effective method of ensuring dry compressed air supply
- Low pressure drop even with load variances ensures reliable air supply
- High Efficiency Aluminium Cooling Technology ensures low energy consumption
- Flow rate capacity 849L/min / 30CFM
- Operating Pressure 102PSI
- 240V power supply

Application Info

- Ideal for use with Plasma Cutting systems and other sensitive processes requiring moisture-free compressed air
- Essential for coastal and humid environment workshops

Welder/Generator
Miller Big Blue Airpak

- A complete mobile welding, air and power workshop for on-site maintenance and fabrication
- Welder/Generator/Air Compressor - Provides a go anywhere solution for field jobs requiring welding, gouging or cutting, compressed air and AC auxiliary power generation
- Multi-Process Capability - MIG, Stick, DC TIG, Air Carbon Arc Gouging, Submerged Arc & Air Compressor
- Awesome 750A DC welding output delivering 500A at 40V @ 100% duty cycle
- Independent Compressor Controls - On/off switch for applications not requiring compressed air. At idle speed will produce 100 PSI at 40 CFM
- Ultra-Reliable Industrial Rotary Screw Air Compressor
- Heavy Duty Low-Speed Industrial Turbocharged Diesel Engine - Provides ample power at high altitudes
- Independent Generator Power - 4000 watts of continuous output for lighting and power tools, even while welding at 500 Amps

Feature Product:
Heavy Duty Earth Clamp

Weldclass Platinum

Fast & easy to fit
No cable lug required! Cable Fits Directly to Clamp using a Hex-Wrench / Alan-Key (supplied with the clamp)

Very Positive Cable Connection
Withstands high degree of cable strain

Robust & Durable Design

One-piece Solid Brass Cable Terminal & Jaw
Very direct current flow from cable to job to ensure minimal amperage loss

JAYMAC endorsed

The **Weldclass Platinum Heavy Duty Earth clamp** is Jaymac's most **highly-recommended** and **popular** earth clamp. It is **very robust** and provides very **positive earth connection** as well as being **very quick** and **simple to fit!**

Electrode Ovens

- Keeps electrodes moisture-free for optimum weld quality and electrode performance
- Round/Cylindrical Chamber keeps electrodes in better condition & avoids flux chipping, unlike square shaped ovens where electrodes tend to roll from one corner to another and are more readily damaged
- Variable temperature

Application Info

- Commonly used with Low-Hydrogen electrodes, so that low-hydrogen status is not compromised through moisture contamination
- Suitable for all types of electrodes

Part No.	Description	Unit	Qty	Net Price (Ex GST)	Net Price (Inc GST)
6-5KGEO	5kg Capacity 240v, 50-220c	EACH	1	$283.50	$311.85
6-10KGEO	10kg Capacity 240v, 50-220c	EACH	1	$330.75	$363.83

JAYMAC Tech Tip

Electrode ovens are designed to keep **welding rods dry.** This is especially **critical** for **low hydrogen** electrodes (7016, 7018, 7024, etc.) **Moisture** can lead to **hydrogen cracking** in the weld. The **higher the strength** of the steel, the **more prone to hydrogen problems.** Warm welding rods will often **perform better** too.

JAYMAC Tech Tip

Earth Clamps are **often overlooked** but can often be the **cause** of **frustrating problems.** A poor quality, damaged or poorly-fitted earth clamp can **substantially increase resistance** which in turn **reduces the output** of your welder. A good solid earth is **essential** for **optimum welding performance.**

Cool Gel
Heat Barrier spray

- Prevents Damage & Accidents from Torch Flame, Welding Arc & Heat Transfer
- Saves Frustrating Repairs that Cost Time & Money
- Use During Welding, Heating, Soldering or Brazing
- Prevents: Paint & Surface Damage, Warping, Valve Damage, etc. Also reduces danger of fire.
- Protects: Metal, Wood, Wallboard, Rubber, Insulation & Many other Surfaces

How does it Work?

- Cool Gel is a Heat Barrier Spray
- Spray On the Surfaces that will/may be affected by heat, prior to starting the job
- As the flame/arc is applied, the Gel will evaporate in the area close to the flame/arc
- Cool Gel will prevent heat transfer/damage to nearby components/ surfaces during heating/welding
- Wipe off after use, or simply leave to evaporate in 24-48hrs

- Suitable for retaining wrapping components that require slow cooling / heat-treating

User Info

- If protecting critical or costly surfaces/items, always use more layers initially, and test on a non-critical surface first
- When using for surface protection: If possible use on an incline of at least 15 degrees, or when neccessary to use in horizontal position add more layers

Gas Struts

Calculating Installation Of Gas Struts

$$F1 = \frac{G \times L}{b \times n} \times 11$$

Example: G = 30kg, L = 400mm, b = 200mm, n = 2

$$F1 = \frac{30 \times 400}{200 \times 2} \times 11 = 330N$$

F1	=	Pressure required for each gas strut (in Newtons)
G	=	Weight of flap in kg at the centre of gravity of the flap, allowing for door locks etc
L	=	Distance from centre of gravity to pivot point in mm
b	=	Effective lever arm of gas strut in mm, flap open
n	=	Number of gas struts (normally 2 per flap
11	=	Conversion factor from kg to N + safety margin
P	=	Distance from pivot point to point of attachment of gas strut = approx 2/3L

   "PPSA" means the Personal Property Securities Act 2009 (Cth).
   "You" means the person named in the Customer Account Application as the Customer.

Terms used in these Terms and Conditions which have defined meanings in the PPSA or ACL have the same meanings in these Terms and Conditions

2. PRICE
   2.1 The "price" of Goods and/or Services will be the then current price as determined by Jaymac and notified to You.
   2.2 All prices are GST exclusive. GST is payable by You in addition to the price at the same time as the price is payable.
   2.3 A $15.00 handling charge will apply to all invoices under $50.00.

3. LIABILITY
   Where You comprises more than one person, each such person shall be jointly and severally liable to Jaymac under these Terms and Conditions.

4. PAYMENT
   4.1 The price shall be paid by You in cash or by cheque not later than thirty (30) days after after the end of end of the month in which the invoice was raised. Time is of the essence in that regard.
   4.2 If You fail to make any payment when due all other amounts whether then due or not will become immediately due and payable

   Jaymac reserves the right to recover from You a default charge on overdue amounts calculated on a daily basis at the rate which is of 4% above the Westpac Reference lending rate as published from time to time upon the outstanding balance of the price and to be payable by way of liquidated damages for breach of contract.

   You must pay all costs and expenses (on a solicitor-client basis) reasonably incurred by Jaymac arising out of any breach by you of these Terms and Conditions.

5. SUPPLY
   5.1 Every endeavour will be made by Jaymac to supply the Goods and/or Services within the period, if any, requested by You but no liability is accepted by Jaymac for delay in delivery or non-delivery.
   5.2 Jaymac reserves the right at its discretion to discontinue supply to You at any time.

6. EXAMINATION
   You are responsible for examination of the Goods upon delivery or collection and any alleged damage, deficiency or non conformity with order must be reported to Jaymac in writing within two (2) business days of such delivery/collection otherwise no claims shall be considered.

7. TITLE AND TRANSFER
   7.1 Title in Goods shall remain with Jaymac until You have paid all monies due to Jaymac on any account whatsoever. Until that time You must-
      7.1.1 At all times ensure that Goods are marked in a way that will enable their identification as property of Jaymac;
      7.1.2 Except as mentioned in clause 7.2 not purport to mortgage, charge, transfer, convey or otherwise deal with Goods without the prior consent of Jaymac;
      7.1.3 At all times allow Jaymac access to Goods to inspect them and to re-take possession at its discretion and indemnify Jaymac against all claims whatsoever (including claims of trespass) arising out of the exercise or purported exercise of rights under this clause;

8. PPSA
   8.1 You hereby grant to Jaymac a Security Interest in all present and after acquired Goods and their proceeds (including any accounts and accessions) to secure all monies owing to Jaymac now and/or in the future by You.

Trading Terms & Conditions... Cont.

8.2 You agree that:

(a) Jaymac will continue to hold a Security Interest in the Goods in accordance with the PPSA, notwithstanding that the Goods may be processed, commingled or become an accession with other Goods.

(b) You will do all the things necessary to enable Jaymac to perfect and maintain its security interest including providing all information Jaymac requires to register a Financing Statement or Financing Change Statement on the Personal Properties Securities Register ("PPSR") as a Security Interest and a Purchase Money Security Interest pursuant to the PPSA;

(c) You will not change your name, ACN or ABN or other details required on the PPSR, without first notifying Jaymac;

(d) Jaymac need not give You any notice required under the PPSA unless the requirement to give notice cannot be excluded;

(e) You must pay any and all costs, expenses and other charges incurred, expended or payable by Jaymac in relation to the filing, dis charge or necessary amendment of any Financing Statement or Financing Change Statement.

(f) You will not allow security interests to be created or registered over the Goods in priority to the security interest(s) held by Jaymac.

(g) To the extent the law permits them to be excluded Sections 95, 118, 121(4), 125, 130, 132(3)(d), 132(4),135, 142 and 143 of the PPSA shall not apply.

9. CONSUMER GUARANTEES

9.1 If Goods and/or Services are supplied to You as a Consumer, the ACL provides for You to have the benefit of consumer guarantees which cannot be excluded. You will be entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You will also be entitled to have goods and/or services repaired, replaced or re-supplied if they fail to be of acceptable quality and the failure does not amount to a major failure.

9.2 To the extent permissible by law ,the liability of Jaymac in respect of a breach of a consumer guarantee or any warranty made under these Terms and Conditions for any Goods and/or Services not of a kind ordinarily acquired for personal, domestic or household use is limited at the option of Jaymac:

(a) In the case of Goods to -
- replacing Goods or the supply of equivalent Goods;
- the repair of the Goods;
- the payment of the cost of replacing Goods or of acquiring equivalent Goods; or
- the payment of the cost of having Goods repaired.

(b) In the case of Services to -
- the supplying of the Services again; or
- the payment of the cost of having the Services supplied again.

9.3 To the extent permitted by law, all other warranties whether implied or otherwise, not set out in these Terms and Conditions are excluded and Jaymac is not liable in contract, tort (including, without limitation, negligence or breach of statutory duty) or otherwise to compensate You for:

(a) any increased costs or expenses;

(b) any loss of profit, revenue, business, contracts or anticipated savings;

(c) any loss or expense resulting from a claim by a third party; or

(d) any special, indirect or consequential loss or damage of any nature whatsoever;

(e) arising out of the Jaymac' supply of Goods and/or services to You or caused by Jaymac's failure to provide or delay in providing Goods and/or Services.
